2019 Belmont SWCD Tree Seedling Sale

Thursday, April 18 & Friday, April 19, 2019 from 11:00 a.m. – 6:00 p.m.

45420 Roscoe Road St. Clairsville, OH 43950 (**Belmont SWCD building at the New Fairgrounds**). Pre-orders are encouraged due to limited supplies. First come, first served. Any orders not picked up by Friday, April 19, 2019 at 6:00 p.m. will be considered a donation to the Belmont SWCD.

Red Oak

One of the fastest growing oak trees that provides excellent fall color with very few dead lower branches, if any. It is an ideal timber and wildlife tree. It is tolerant of many soil conditions and does well on north-facing slopes. It will reach 60-80- feet.

White Oak

An excellent timber and wildlife tree. It is slower growing, but long lived and is tolerant of many soil conditions and reaches 60-80 feet.

Burr Oak

Is one of the slower growing oaks. Acorns mature first year and are the largest of any North American oak. It is fire and drought resistance. Grows 100 feet.

Sycamore

This tree is easily identified by its height, spreading canopy, and white bark. Growth rate is medium to fast with a height 80'. It prefers full to part sun. Grows well in moist, well-drained soils.

Domestic Apple

Deciduous tree growing to 30ft. The flowers that bloom from April to June are hermaphrodite (have both male and female organs) and are pollinated by insects. It is noted for attracting wildlife. Prefers well-drained soil.

American Basswood

Also known as American Linden. It is a favorite tree of bees. Good shade tree that has a spread up to 40' and height up to 80'. Prefers full to part sun. Grows in moist, drained soils.

Pawpaw

An excellent ornamental and wildlife tree that produces edible fruit. Zebra swallowtail host plant. It is slower growing, but long-lived. It does best on rich sites and stream bottoms, as an understory component and grows to 40 feet.

River Birch

This tree is known for its flaky, orange, ornamental bark. Growth rate is rapid with a mature height at 50'. Prefers full to part sun. It grows well in moist to wet, acidic soils.

Persimmon

Known for its ripened fruit, providing food for animals and humans alike in mid to late autumn is used for golf club heads and billiard cues. It is adaptable to a variety of soil and moisture, and polluted conditions and grows to 50 feet tall.

Redbud

Is a small tree in which branches grow outward rather than upward. It is frequently used as an ornamental bloomer in spring with bright pink flowers. It grows well in moist, but not wet soils. Average height is 40 feet.

Dogwood (White Flowering)

One of the most popular ornamental trees with early spring flowers and red fruits and crimson foliage in autumn. It prefers evenly moist, well-drained, fertile, deep soils of acidic ph in partial sun. It may reach 30 feet wide and 15 feet tall.

Sugar Maple

Valued for its syrup production and hard, dense, fine-grained and difficult-to-split wood, which is utilized for floors, furniture, veneer, musical instruments and railroad ties. A favorite shade tree with reliable fall color may reach 80 feet.

Black Elderberry

Is a large shrub or small tree with irregular crown with clusters of white flowers and small black or purple berries. Prefers wet soils in open areas near water at forest edges. Elderberries are used for making jelly, preserves, pies, and wine.

Colorado Blue Spruce

Fine for ornamental and Christmas trees. It displays a blue or green-silver short needle. It prefers moist, acidic soils, but not poorly drained or wet. Grows to 50 feet tall.

White Pine

A native pine, classed as a "soft pine", is the only 5-needled pine in the eastern U.S. It is an important for timber, excellent ornamental tree, windbreak or for wildlife habitat. It performs best in evenly moist, rich, well-drained, acidic soils in full sun. It is fast growing.

Black Cherry

An excellent timber and wildlife tree. Host plant of the eastern tiger swallowtail and the coral hairstreak. It prefers moist to dry soil containing loam. Grows 100 feet.
